

## Life Stories Residents Template

The information gathered below can be used to create personalised life stories activities on the editable omiVista system for the named resident. The personalised “Life Stories” content can be centred around images provided by friends and family of residents.

### Image requirements

For best results images should be scanned. We would recommend a diverse selection of images representing different elements of the residents individual life story. Landscape images are preferred as they best suit the tabletop format.

For more on how to create life stories activities please visit: [www.omi.uk/video-tutorials/](http://www.omi.uk/video-tutorials/)

**My name is**

**I like to be called**

**Important dates**
