OM INTERACTIVE

Improving well-being, and igniting joy. OM Interactive's cutting-edge interactive systems engage, enable, and empower individuals of all abilities, creating moments of pure joy and laughter. Step into a world where technology and imagination converge, nurturing smiles, and deepening connections. Experience the extraordinary magic of providing care like never before, and embark on a journey of limitless potential.

CARE RESEARCH

In collaboration with Care Research, we've embarked on an extensive research project exploring the impact of the Mobii Magic Table across England.

Care professionals have witnessed positive changes in those who have used our systems:

- Emotional stability
- Overall mood and outlook
- Sense of self-worth and belonging
- Physical effort and energy levels
- Willingness to socialise
- Ability to enjoy shared activities

RESEARCH FINDINGS

1. An overwhelming **96%** of respondents recommend the Mobii.
2. Reminiscing becomes a joyful experience as **92%** of participants share their memories and past experiences during sessions.
3. Over **90%** witnessed positive impacts on residents' physical abilities, participation, and movements.

"It's moving to see the impact the Mobii table has. The therapeutic benefits are incredible, and we've seen families having a great time as they experience the table alongside their loved one."

Martyn Dawes,
Home Manager of Caddington Grove, Hamberley Care

CARE SUITE - NOW BURSTING WITH 200 ACTIVITIES!

This Suite has been specifically designed to include all of the important elements necessary to stimulate, engage, relax, and provide opportunities for shared enjoyment.

The wide variety of activities include:

- Interactive quizzes to encourage discussion, and maintain memory and recall
- Scenes and sounds from nature including virtual water effects, and therapeutic colouring
- Social games with rising difficulty and rewards, promoting physical dexterity, and joint effort
- Nostalgic themes and music to stimulate conversation, movement, and reminiscence

Quiz Pro! Enjoy a variation of 100 thought-provoking questions that add a fun twist to your interactive experience.

"We are delighted with the positive impact the Mobii system is having on our residents living with dementia, their families, and our team members. The interactive nature, the great variety of activities, combined with the ability to move the system to those who are less mobile, makes it a truly person-centred resource."

Jackie Pool,

UK Director of Memory Care & Programming, Sunrise Senior Living and Gracewell Healthcare

OPTIONAL GAMES

Designed to elevate your omiVista and omiReflex systems, these games bring interactive fun to both table, and floor play. Each game pack features a collection of games that promise endless enjoyment for everyone. Visit omi.uk/games for more details.

SYSTEM VERSIONS

There are several versions of our interactive system, each fully self-contained, and pre-loaded with tailor-made activities to suit your specific needs.

Portable and electrically height adjustable system projecting onto a table, bed, or floor

**omiVista
mobii**

**omiVista
install**

Fixed-ceiling system projecting onto a floor, or table

new

**omiVista
budii**

Wall-mounted, compact system, that projects onto floors, tables, or other horizontal surfaces

Designed for smaller spaces, and suitable for home use.

omiReflex

Fixed and mobile wall projection system

omiReflex is an interactive wall projection system that displays a 'magical' mirror image of the resident, while projecting dynamic moving images that they can interact with.

omiSurface for all systems*

Editable software gives full control over your content creation, so staff can:

- Import their own images, videos and sounds
- Create their own activities

omiSurface

*Does not apply to the omiVista Budii

omiWall

Fixed-ceiling install system that projects onto walls, or any light-colour, vertical surfaces.

Residents engage with the wall-projected activities through motion-activated touch.

new

Activity Kit

Tools to aid:

- Mindful colouring
- Throwing and catching
- Reaching and stretching
- Reflexes and co-ordination
