

# Bringing Joy to ASN support through Interactive Sensory Projection

## OM INTERACTIVE

**Improving wellbeing and bringing joy**, OM Interactive's sensory projection systems support meaningful engagement for people of all abilities. Used across ASN support environments, they **encourage movement, cognitive stimulation, and social connection** – creating positive moments for users and support teams.

## DESIGNED FOR ALL ASN ENVIRONMENTS

**Support teams need solutions that work for everyone.**

OMi's sensory systems are designed to support adults with additional support needs who may be:

- Living with **learning disabilities**
- Living with **physical disabilities**
- Living with **cognitive needs**
- Using wheelchairs or mobility aids
- Experiencing sensory processing differences
- Spending time seated or requiring supported positioning

Our systems adapt to each individual's abilities and preferences, making activities accessible, inclusive and engaging for everyone.

## HOW IT WORKS

Images are projected onto a table, floor, wall, or bed. When an individual reaches out - with a hand, foot, or movement - the image responds instantly.

- Colours change and follow their touch
- Sounds and music respond to movement
- A ripple spreads across water
- Leaves scatter and move

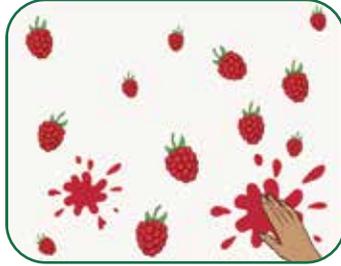

Sessions can be calm and relaxing or active and energetic - easily adjusted to suit the needs, mood and abilities of each individual or group.

## ASN SUITE - NOW BURSTING WITH OVER 200 ACTIVITIES!

Designed to stimulate, engage, relax, and encourage shared enjoyment, the activities include:

- **Physical Games** to encourage movement and teamwork.
- **Social activities** to aid communication skills and promote collaborative effort.
- **Cognitive stimulation activities** designed to support attention, recognition, and mental engagement.
- **Nature scenes** with calming water effects and mindful colouring activities.

### BRAIN GAMES BUNDLE - OPTIONAL

Stimulate cognition and foster connections with **Puzzle**, **Sort Pro**, and **Match Game**.

These games are designed to engage minds, encourage social interaction, and create meaningful moments for users of all abilities.

Discover the full range at [www.omi.uk/games](http://www.omi.uk/games)

**Puzzle**

**Sort Pro**

**Match Games**

### ADDITIONAL GAMES - OPTIONAL

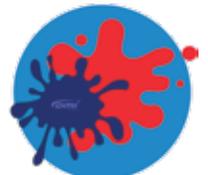

Expand the fun and engagement with a variety of interactive game packs.

*Single-Player Game*

### SMARTVIEW - EASILY PROJECT CONTENT FROM YOUR OWN DEVICE

Effortlessly connect compatible HDMI devices - such as mobile phones, laptops, or game consoles - to the Mobii for instant content sharing.

Perfect for inter-generational sessions, for users of all abilities.

### EDITABILITY - PERSONALISE ACTIVITIES

Personalise activities using familiar photos, themes and interests that motivate and engage each individual.

The easy-to-use interface allows staff to create personalised sessions tailored to users' preferences, supporting communication, participation and sensory engagement.
